

# Contents

1. Introduction .....	1
Paper goals and objectives .....	2
Paper organization .....	3
2. Types of Hydrokinetic Projects .....	5
Categorizing technologies.....	5
Wave Energy Technologies .....	6
Current Energy Technologies .....	9
Additional technology information needs.....	11
3. Types of Recreation in Hydrokinetic Settings.....	13
River settings .....	13
Marine settings.....	15
Recreation opportunities in both marine and river settings .....	19
<i>In Focus: What If Area Recreation Uses Are Unknown?</i> .....	20
4. Concepts for Assessing Impacts .....	23
Basic recreation management concepts .....	23
Applying recreation concepts to hydrokinetic impact assessments .....	24
Distinguishing direct and indirect impacts.....	25
Level of effort and “a progression of study options” .....	26
Integrating concepts into project licensing .....	28
5. Potential Impacts on Recreation Opportunities .....	29
Access restrictions and public safety .....	29
Aesthetics and noise.....	30
Impacts on waves or hydraulic characteristics.....	32
Wreckage and salvage impacts .....	33
Displacement that leads to crowding at substitute areas.....	33
Fish, wildlife, and related ecological impacts.....	34
Local recreation economic impacts.....	35
<i>In Focus: Example Access Restrictions for Different Types of Devices</i> .....	36
<i>In Focus: Example Access Restriction Impacts for Recreation</i> .....	40
<i>In Focus: Example Aesthetic Impacts and Issues</i> .....	43
<i>In Focus: Example Ecological Impacts with Recreation Implications</i> .....	45
<i>In Focus: Assessing Cumulative Impacts on Recreation</i> .....	47
6. Types of Studies for Recreation Impacts of Hydrokinetic Projects .....	49
Level 1 methods.....	49
Level 2 methods.....	53
Level 3 methods (“intensive studies”) .....	56
Economic impact and valuation studies.....	59
<i>In Focus: Hydrokinetic – Recreation Studies on the Lower Mississippi River</i> .....	63
<i>In Focus: Evaluating Recreation Implications of Biological Changes:</i> .....	64
<i>The Example of Fishability Studies in Traditional Hydropower Relicensing</i> .....	64
<i>In Focus: Mapping the Relative Importance of Recreation Areas</i> .....	65
<i>In Focus: Effective &amp; Efficient Monitoring: Choosing Appropriate Indicators</i> .....	66
<i>In Focus: Integrating Information Across Disciplines</i> .....	67

7. Protection Strategies and Adaptive Management.....	69
Protection strategies .....	69
Adaptive management framework .....	72
8. Getting Involved:.....	73
Authorities and information requirements .....	73
FERC Licensing Processes .....	76
<i>In Focus: FERC Recreation and Aesthetic Information Requirements</i> .....	78
<i>In Focus: Making Study Requests and Settlements</i> .....	79
<i>In Focus: Hydropower Proposals and the National Park Service</i> .....	80
9. References .....	83
10. Glossary.....	93
11. List of interviewees .....	99
12. List of hyperlinks.....	104
